

# RO Maple Production Multiple-Pass Systems

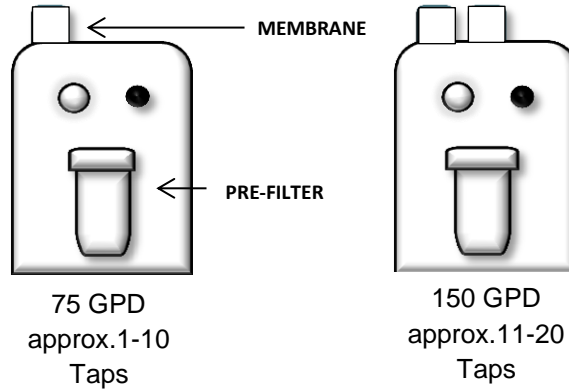

\*\*\* Membrane manufacturer flow rates will vary with colder temperatures.

All 12" Hobbyist units are made with a booster pump and are mounted on a rugged, durable aluminum frame.

All 21" & 40" Series units are made with a 110V, 1/3HP motor and a high-pressure brass 140gph booster pump, And are mounted on a durable, portable steel frame cart – perfect for outdoor use.

## 12" Series Hobbyist

Recommended for approx. 1-20 Taps

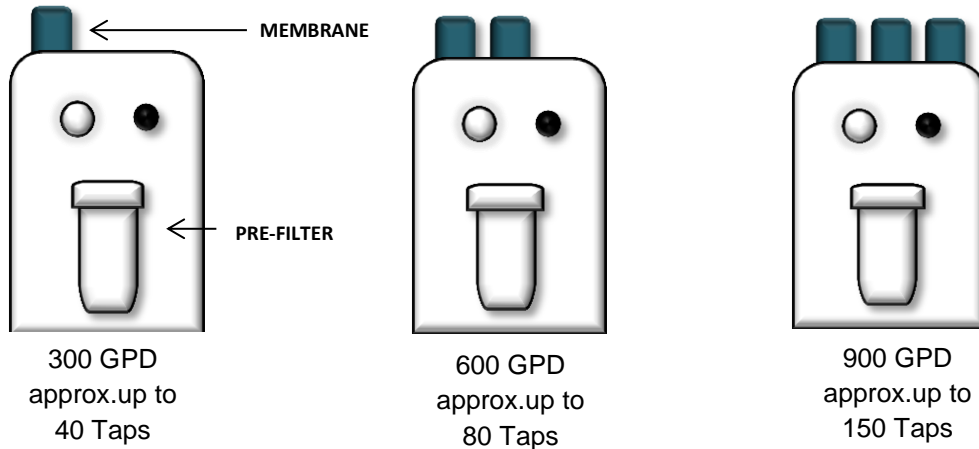

These approximations are only guidelines, to help you have a better idea of the size of system that you need/ production rates you want. (eg. how long you are running your RO Maple.)

\*\*\* If you have a 4 post, or more, RO Maple Unit, we recommend the 327gph 1/2" NPTF booster pump and the 3/4 hp motor.

## 21" Series

Recommended for approx. 25 – 200 Taps

## 40" Series

200 or more Taps
